Uni-Spray Custom Injection Moulded Plastic Parts

Uni-Spray Systems Inc., a global leader in custom injection moulding, offers complete and innovative solutions for all your plastics needs.

Our Waterloo-based company brings together cutting-edge equipment, robotic technologies and over 25 years of expertise to provide our customers with a single source for precision plastic parts and assemblies — from engineering, product design and prototyping to manufacturing, assembly and packaging.

With customer service and ongoing product support second to none, Uni-Spray Systems is a company our customers can depend on.

CONTACT US for a competitive quote on moulded parts you already use or any new innovations.

What We Do

- Custom injection moulding • Product design and enhancement
- Prototyping • Material selection • Kanban of customer stock
- Engineering • North American and offshore tool design as required • Mould flow analysis
- Production part approval process (PPAP)
- Quality control planning and implementation

Why Choose Us?

Uni-Spray Systems delivers best-in-class service, consistent high-quality products, rapid turnaround, and full-service solutions:

- Design and engineering • Tooling and fixtures
- Prototyping of parts and tools • Material selection
- Assembly and decoration • Packaging
- Dedicated customer service and support
- Commitment to quality in both products and processes

To meet customer demand and ensure prompt delivery, Uni-Spray Systems runs injection moulding machines ranging in size from 40 to 350 tons. We use state-of-the-art industry tools such as mould flow analysis to determine optical gate location, tool venting, weld-line placement, part temperature variation and optimal wall thickness so that problems are eliminated before tooling is manufactured. Working closely with your design team, our company delivers success at every stage of the manufacturing process.
